

Assisted Reproduction and the Rights of the Child

A Comprehensive Guide

Assisted reproductive technologies (ART) are becoming increasingly common, and with them come a growing number of legal and ethical issues. Assisted Reproduction and the Rights of the Child is the definitive guide to these issues, providing a comprehensive overview of the ART landscape, including the different types of ART, the legal and ethical issues involved, and the rights of children born through ART.

Babies of Technology: Assisted Reproduction and the Rights of the Child by Mary Ann Mason

This book is essential reading for anyone who is considering ART, or who is involved in the legal or ethical aspects of ART. It is also a valuable resource for parents, educators, and policymakers.

Topics covered in this book include:

- The different types of ART, including IVF, ICSI, and surrogacy
- The legal and ethical issues involved in ART, including the rights of children born through ART
- The rights of children born through ART, including the right to know their genetic origins
- The role of the state in regulating ART
- The future of ART

About the author

Dr. Jane Doe is a leading expert in the field of ART. She is a professor of law at the University of California, Berkeley, and the author of several books on ART and the law. Dr. Doe's work has been cited by the Supreme Court of the United States and by courts around the world.
