

# Imperial Japanese Navy Submarines 1941-45: A Historical and Technical Guide to Japan's Submarine Fleet During World War II

The Imperial Japanese Navy's submarines played a critical role in the Pacific War during World War II. They were responsible for sinking over 200 Allied ships, including several battleships and aircraft carriers. This book provides a comprehensive guide to these submarines, detailing their development, design, and combat history.

## Development and Design

The Imperial Japanese Navy began developing submarines in the early 20th century. Their first submarine, the I-1, was launched in 1904. The I-1 was a small, single-hulled boat with a displacement of only 65 tons. It was armed with two torpedo tubes and a single 47mm gun.
