Elements of Effective Storytelling

- 

1. A polished, thoughtful and complete narrative.
By actually pulling time (and maybe emotions) into your work, your audience will see that you actually care about those you are helping. And that you truly want their stories to be told.
- 

2. Photos, especially those of young children.
A visual representation of life's story provides evidence of history. On the other hand, images that lack any type of contextual grounding or focus did not work well and yielded extremely low engagement.
- 

3. A story length of only 500-800 words.
Brevity is concise but impactful means your audience won't be distracted or bored when reading your content.
- 

4. Stories that followed a Greek or Shakespearean story arc with five key components.

 - Exposition (setting the stage)
 - Rising Action (what happens leading up to a big moment)
 - Climax (the big moment)
 - Falling Action (what follows the big moment)
 - Resolution (the ending, hopefully a happy one)
