Dr. Ahmed argues that the partition was not simply the result of religious differences between Hindus and Muslims. While religious tensions certainly

played a role, they were only one of many factors that contributed to the division of the subcontinent. Other factors, such as political ambitions, economic disparities, and the role of the British colonial power, were also significant contributors to the partition.

One of the key strengths of Dr. Ahmed's book is his ability to provide a balanced and impartial account of the events leading up to the partition. He avoids taking sides and instead presents a thorough analysis of the various perspectives and motivations of the different actors involved. This approach allows readers to gain a deeper understanding of the complexities of the situation and to draw their own conclusions about the causes of the partition.

Another important contribution of Dr. Ahmed's book is his focus on the human cost of the partition. He vividly describes the suffering and dislocation that millions of people experienced as a result of the division of the subcontinent. By putting a human face on the partition, Dr. Ahmed helps readers to understand the magnitude of the tragedy and its lasting impact on the people of South Asia.
